

Cell-A-Phobe

A digital microscope for commuters who use public transportation and germaphobes alike. This application turns your cell phone into a microscope that can see germs on any public handle, door knobs, or even your hands. You can scan any surface and see how dirty it is!

Discover the dangers that linger in your day to day life!

Cell-A-Phobe's revolutionary algorithm allows any cell phone's rear facing camera to scan and take pictures with up to 500x magnification. Images can be shared to collect data on which surfaces are the dirtiest in your area! You can share your findings with other commuters and germaphobes nearby!
